

Enterprise Billing Portal: 2FA Access & Setup Guide

Multi-Factor Authentication (TOTP) & Gateway Security Operations

Domain: <https://billing.chettiyarkada.in> | Auth Standard: Google Authenticator (RFC 6238 TOTP)

1. System Overview & Security Architecture

To protect Chettiyar Kada's financial, invoicing, and POS infrastructure, an enterprise **Two-Factor Authentication (2FA) Reverse-Proxy Access Gate** has been deployed for <https://billing.chettiyarkada.in>. Any unauthenticated browser attempting to connect to the billing system is intercepted at the network perimeter and prompted for staff credentials and a synchronized **Google Authenticator (TOTP)** 6-digit passcode before being proxied to the internal ERPNext application.

Public Access Exemption: The shared product catalogue viewer (<https://billing.chettiyarkada.in/frontend/catalogueviewer>), catalogue media (/files/), and frontend styling assets are kept completely public and excluded from the 2FA gate so retail customers can browse store offers without requiring an authenticator.

2. Provisioned Administrator Credentials

Parameter	Configuration Details
Portal URL	https://billing.chettiyarkada.in (redirects to /gate/login)
Public Catalogue	https://billing.chettiyarkada.in/frontend/catalogueviewer (Public - No 2FA)
Username	admin
Initial Password	ChettiyarAdmin2026!
TOTP Secret Key	WG56VR7SCCFAI3TQUB2050KCC06CXGWW (Base32, 160-bit)
Session Lifetime	12 Hours • Signed HMAC-SHA256 Token (Secure, HttpOnly, SameSite=Lax)
Brute-Force Guard	5 failed attempts maximum → 15-minute automatic IP lockout

3. Google Authenticator Pairing Instructions

How to pair your smartphone:

1. Open the **Google Authenticator** app on your iOS or Android smartphone.
2. Tap the + button (bottom-right) and select **Scan a QR code**.
3. Point your camera at the QR code displayed to the left.
4. *Manual Entry Alternative:* Choose **Enter a setup key**, set Account Name to **Chettiyar Kada Billing:admin**, enter Key WG56VR7SCCFAI3TQUB2050KCC06CXGWW, and select **Time-based**.
5. Your phone will now display a rolling 6-digit passcode that changes every 30 seconds.

CONFIDENTIALITY NOTICE: Anyone with access to this QR code and password can authenticate into the billing portal. Store this document securely and update the default password upon initial login.

4. Daily Staff Login Workflow

- **Step 1:** Navigate to <https://billing.chettiyarkada.in> from any browser. The system will automatically direct you to **/gate/login**.
- **Step 2:** Enter your assigned staff **Username** and **Password**.
- **Step 3:** Open **Google Authenticator** on your phone, read the current 6-digit code for *Chettiyar Kada Billing*, and enter it into the OTP box.
- **Step 4:** Click **Verify & Access Billing**. Upon verification, the gate issues an encrypted session cookie and seamlessly opens the ERPNext billing dashboard.
- **Step 5 (Sign Out):** When finished, visit <https://billing.chettiyarkada.in/gate/logout> to immediately terminate the session.

5. Server Management CLI (Adding & Managing Staff)

System administrators can manage staff accounts directly from the server terminal using the built-in management script:

Task	Terminal Command Line	Description
Create User	<code>node /var/www/billing-gate/cli.js add-user <user> <pass></code>	Creates account & prints terminal QR code
List Users	<code>node /var/www/billing-gate/cli.js list-users</code>	Displays all accounts & 2FA status
Reset 2FA	<code>node /var/www/billing-gate/cli.js reset-totp <user></code>	Generates fresh QR code for a staff member
Change Password	<code>node /var/www/billing-gate/cli.js set-password <user> <newpass></code>	Updates staff login password
Delete User	<code>node /var/www/billing-gate/cli.js delete-user <user></code>	Revokes staff access immediately

6. Service & Infrastructure Reference

- **Daemon Service:** `billing-gate.service` (Node.js on 127.0.0.1:3100, managed via `systemd`)
- **Reverse Proxy:** Nginx 1.24 with `auth_request` `/_gate/verify` subrequest authentication
- **Persistent Data Directory:** `/var/lib/billing-gate/users.json` & `secret.key`
- **Service Status Command:** `systemctl status billing-gate.service`
- **Live Logs Command:** `journalctl -u billing-gate.service -f`
